ABOUT VENDOR HUB

VendorHub is a leading cloud-based technology platform that redefines supplier relationship management (SRM) through an intelligent and integrated solution. The platform enables organizations to efficiently and seamlessly access the most suitable service providers.

VendorHub delivers automated solutions that enhance operational efficiency, accelerate procurement and contracting processes, and ensure transparency across the purchasing cycle. It also strengthens procurement performance by transforming supplier data into strategic insights that create real value throughout the entire procurement lifecycle.

SUPPLIER RELATIONSHIP MANAGEMENT Challenges

1

Fragmented Data: Difficulty in collecting and managing supplier data scattered across multiple systems and files, limiting visibility and hindering effective decision-making.

2

Lack of a Unified Supplier Record: Absence of a centralized and comprehensive supplier database that includes information, documents, and transaction history, reducing efficiency and reliability.

3

Limited Risk and Compliance Oversight: Challenges in monitoring supplier risks and compliance requirements, with limited visibility into the supplier's historical performance and long-term relationship.

Core Capabilities

SUPPLIER RELATIONSHIP MANAGEMENT

UNIFIED SUPPLIER RECORD

A centralized supplier profile including supplier data, documents, classifications, and project history

SUPPLIER QUALIFICATION AND APPROVAL

Digital qualification workflows, compliance requirements, supported by a dedicated team ensuring data quality and accuracy

SUPPLIER COMMUNICATION

Centralized communication through notifications, messages, notes, and full interaction tracking

REPORTING AND ANALYTICS

Pre-built and customizable reports that support informed and data-driven decision-making

EXPRESSION OF INTEREST REQUESTS

Sending expression of interest requests to suppliers, with structured evaluation and filtering to support qualification and contracting decisions

Value PROPOSITION

Extensive Supplier Network:

Direct access to a diverse base of registered and qualified suppliers across multiple industries and sectors.

Confident Supplier Selection:

Improved supplier quality and compliance through clear evaluation criteria and end-to-end visibility.

Higher Speed and Efficiency:

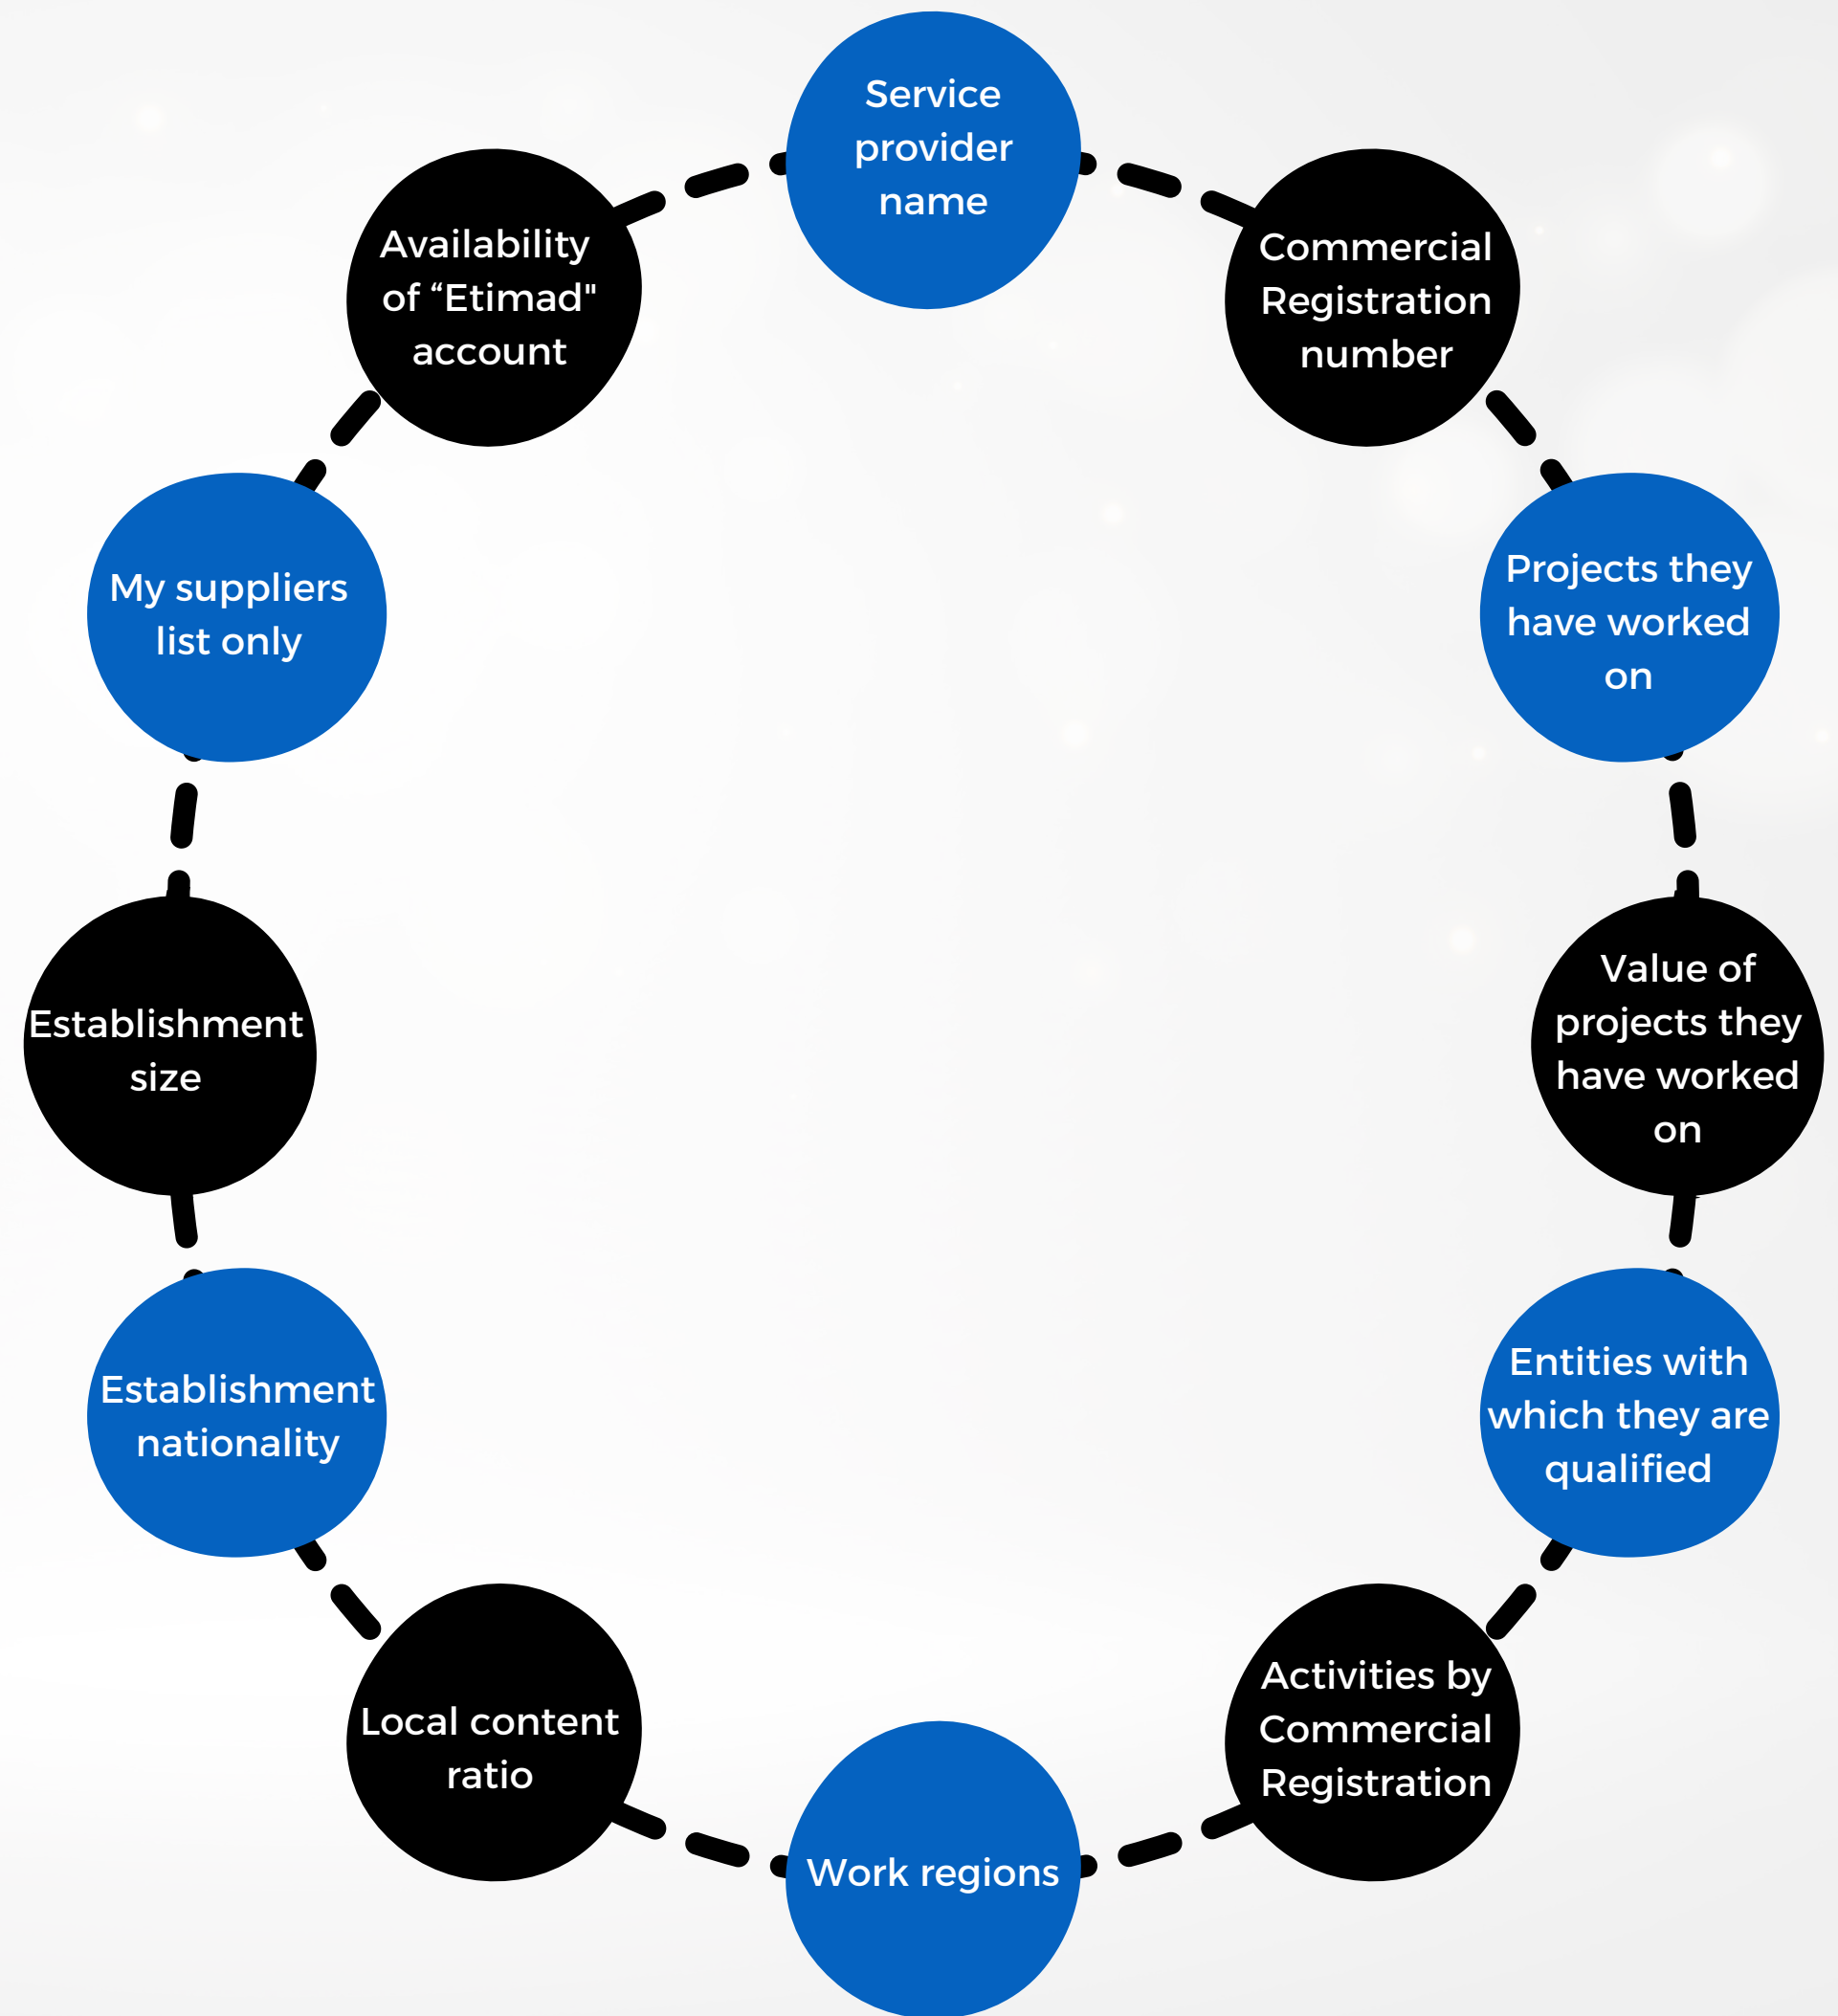

Automated workflows that reduce manual effort and accelerate procurement and contracting cycles.

Expert-Led Support:

A dedicated supplier relationship management team handling operational details, enabling a stronger focus on strategic decision-making.

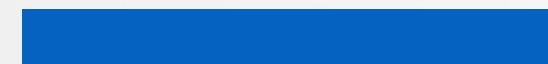

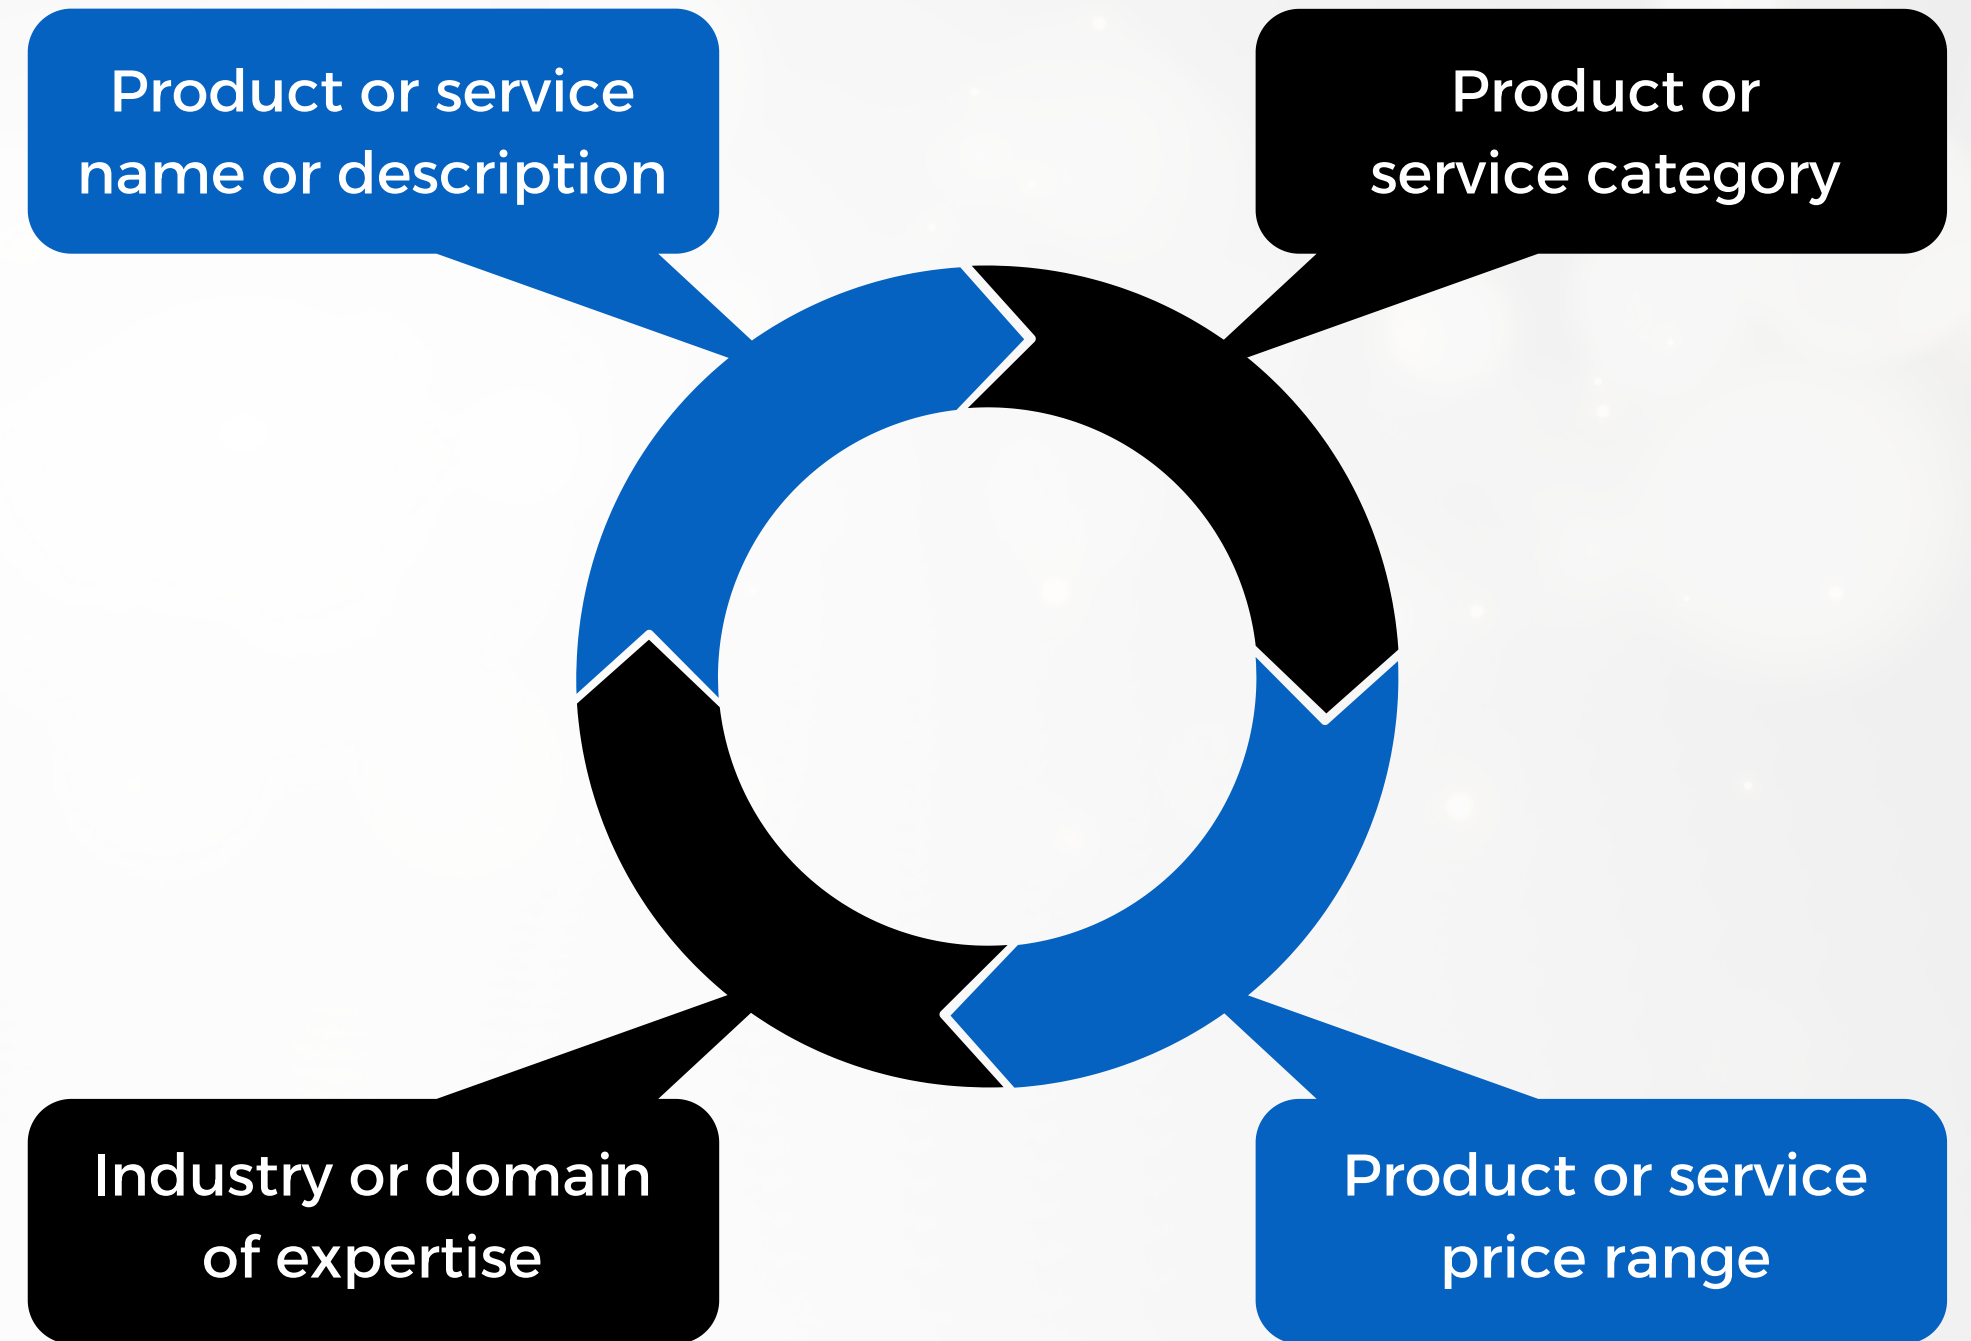

Search for a **SERVICE PROVIDER**

Enables organizations to discover and access service providers through multiple and flexible search options.

Search for a **PRODUCT & SERVICE**

Enables organizations to discover service providers by searching for the products or services they offer.

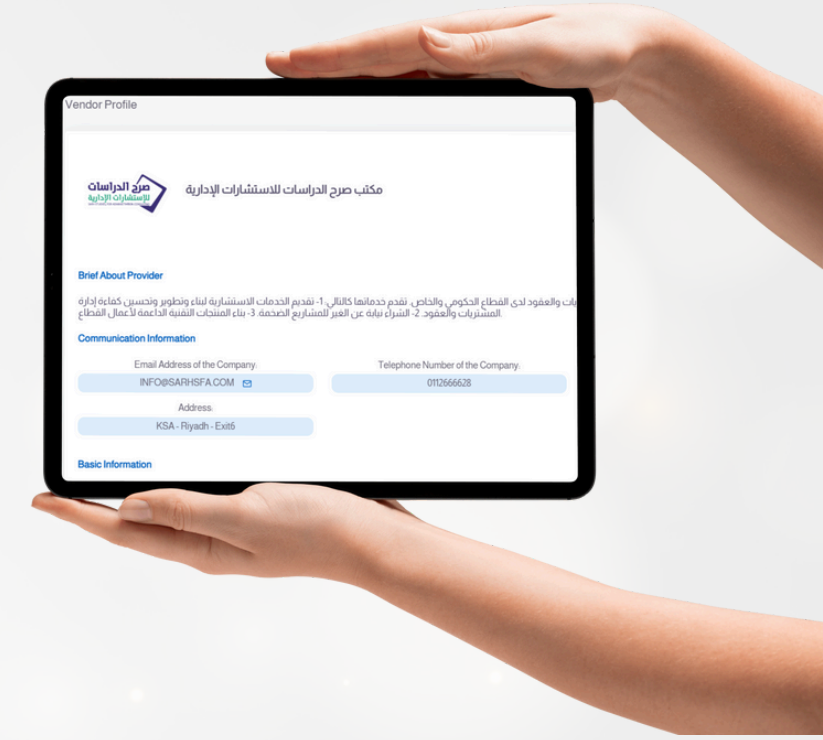

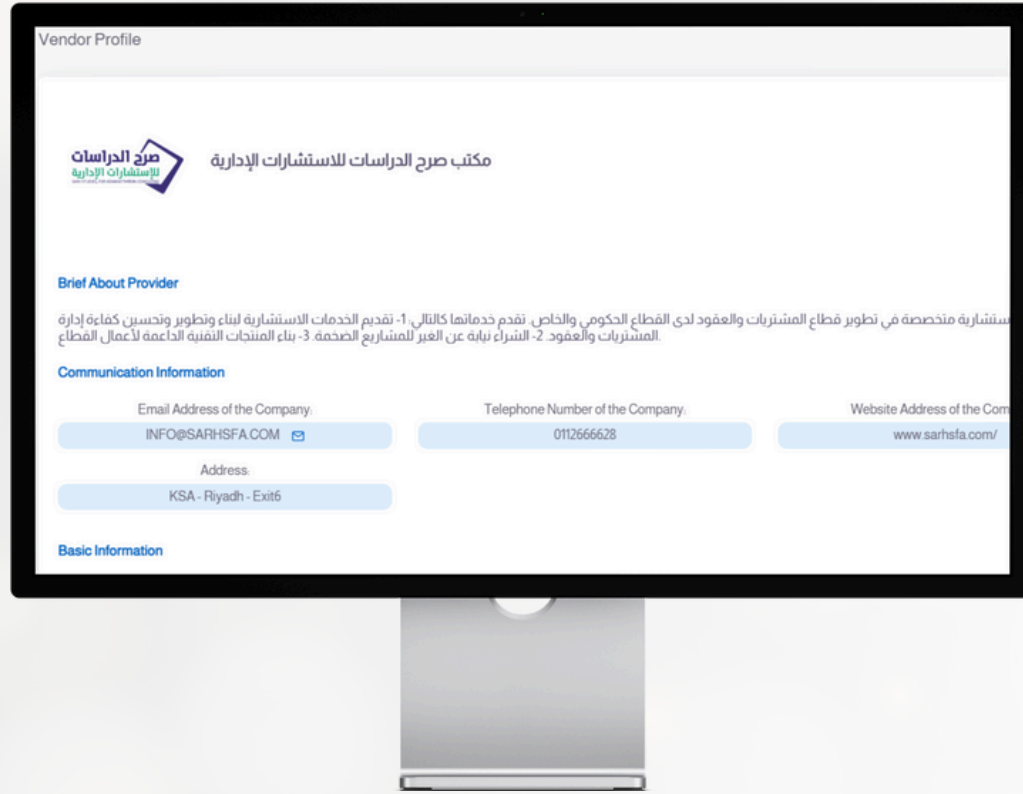

BLOCKED LISTS

Blocked lists allow organizations to exclude specific service providers from search results or prevent engagement with them across other business workflows.

FAVORITE LISTS

Favorite lists enable quick and efficient access to service providers by allowing the creation of multiple, customizable lists tailored to specific business needs.

SERVICE PROVIDER Profile

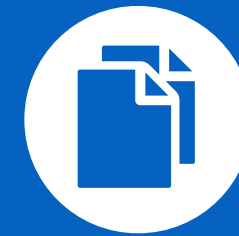

**Basic
Information**
